

# TransTraks - Data Management Where it Counts

TransTraks is designed with the customer in mind. Easy to use, simple to maintain and comprehensive in scope. Key advantages are:

- One price for all the modules
- Single or multi-user for the same price
- Works with Microsoft Access and SQL
- Integrated with Microsoft MapPoint for mapping and routing
- The lowest price in the school transportation industry for a comprehensive software solution
- Allows activity trip requests to be filed by schools via your network or the Internet
- Electronic trip confirmations and invoicing
- Provides Electronic Special Ed Transportation Requests for instant processing by your dispatchers and routers.
- Return on Investment (ROI) times that are measured in months rather than years.

# TransTraks - A New Approach to Transportation Software

TransTraks is a new kind of software designed for the school transportation industry. Easy to learn. Simple to use. Powerful tools. Yet, affordable for all size school transportation operations.

Using the point and click simplicity of Windows and the power of Microsoft Access, you are now in control of all of your transportation data.

TransTraks was developed by and for transportation management professionals. Unlike many other programs on the market today, TransTraks was developed with input from a group of small, medium and large beta school districts. The result is a comprehensive software package for one affordable price.

TransTraks includes the following comprehensive functions:

- Student Database (including student citations and discipline)
- Vehicle Maintenance (including Work Orders and Inventory)
- Computerized Training Records
- Field and Athletic Trips (including computerized confirmations/invoices and school site remote data entry of proposed trips)
- Employee Timekeeping (with optional biometric fingerprint clock-in)
- Employee Database (including discipline and commendations)
- Dispatcher Dashboard - Major Functions at a Glance
- Computerized Routing and Mapping
- Multi-user and Network Ready
- Student Bus Pass System (including Parent Pay)
- Automated Fueling Module (including vehicle mpg and fuel billing reports)

## Written in Microsoft Access

TransTraks is a program written in Microsoft Access, which is an industry standard relational data base. Therefore, its data base structure can be easily modified and expanded to meet future needs and requirements. It is also Microsoft SQL capable for those districts using this database. New staff members can be up and running very quickly when compared to other pupil transportation information systems that often require weeks or months of training. Staff can become productive in TransTraks after just a few short hours of training. The TransTraks System environment makes complex tasks simple, with staff members simply pushing a mouse button to get instant results. By automating and helping to organize the mountains of data related to thousands of students and their transportation needs, the department staff can better manage the entire process.

## TransTraks Is Easily Customized

TransTraks is designed to be easy to customize, relying on numerous user-defined table driven options. This makes it possible for TransTraks to work in a variety of different Transportation environments and be able to change when the department's priorities or procedures need to be modified. The decision is in the hands of the user, not hidden in impossible to understand software coding requiring expensive programmers.

## TransTraks Modules

TransTraks uses various modules to organize your activities. Each module contains the various data entry forms and reports for that particular functional area. Remember, when you buy TransTraks you get **ALL** the modules, not just one or two. More importantly, your budget will like the fact that TransTraks with all its modules often costs less than just one module of other programs on the market. And that is the advantage of TransTraks. We offer a comprehensive data management system that is easy to use and is reasonably priced. Log onto [www.transtaks.com](http://www.transtaks.com) to explore the various modules found in TransTraks. We are sure you will agree that TransTraks has an unbeatable combination of ease of use, functionality and low price.
